

The Red Plan

In the event of a spill of a hazardous substance or hazardous waste at installations of the USAG Mannheim, this Red Plan serves as an immediate action tool to initiate the correct response in the shortest possible time. The remainder of this Spill Prevention and Response Plan (SPRP) reinforces the Red Plan and provides in-depth information on spill prevention, response, notification, and cleanup procedures.

The Red Plan is to be used in the early stages of a spill, and the user is expected to transition to the remainder of the SPRP after appropriate notifications and response actions are underway.

Figure 1. IMMEDIATE RESPONSE ACTION LIST

IF IT IS A MINOR SPILL, CLEAN IT UP IMMEDIATELY!

A minor spill does not:

- 1) enter or threaten waters,
- 2) exceed a "significant" quantity (*see SPRP Section 4.2*), or
- 3) pose a safety or Environmental threat.

1. Report the Spill

Call Facility Incident Commander (FIC) (USAG Fire Department) if on post (**DSN 117**) or off post (**CIV 0621-730-117**)

Report the following:

Initial responder name and location.
Time, location, type/quantity of spill.
Need for emergency medical assistance.

2. Determine Safe Actions

No safe actions may be possible.

What is it, how can it hurt me, and what can I safely do?

- Check MSDS for spilled substance.
- Take safe, no-contact simple actions to help people or stop/contain the spill.

3. Stop the Leak

Do not contact or breathe vapors from material.

- Close valves, stop pumps, shut down power, move containers.

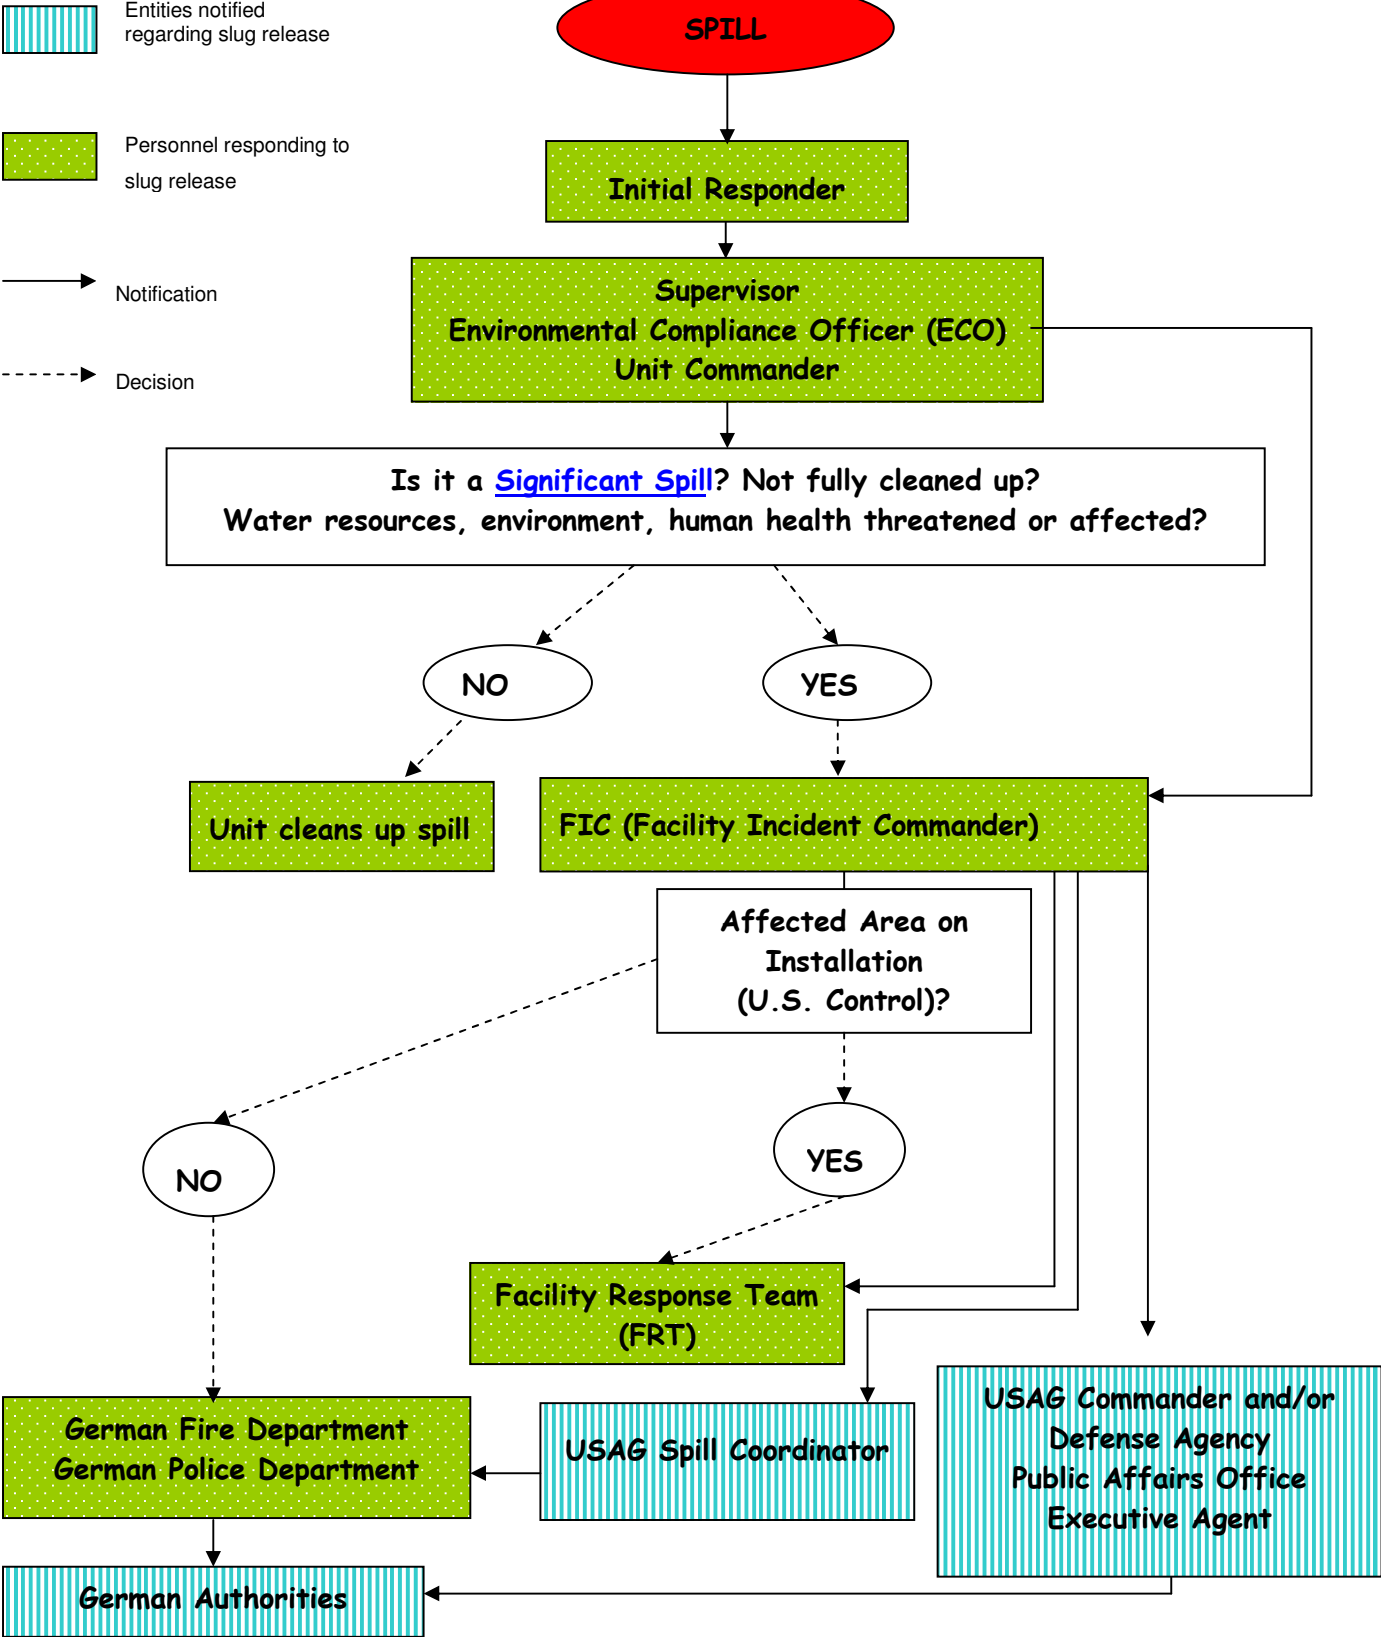

4. Control and Contain

Keep the spill from spreading.
Close containment valves.
Put down portable containments.
Put down absorbents.

Figure 2. FACILITY RESPONSE TEAM (FRT) ACTION LIST FOR MAJOR SPILLS / EMERGENCIES

Follow the Spill Plan	<ul style="list-style-type: none">• Obtain personnel and equipment• Determine installation/unit information
Determine Safe Actions	<ul style="list-style-type: none">• Evaluate material, hazards, evacuation needs• Provide PPE• Determine safe actions and set up team
Rescue and Evacuate	<ul style="list-style-type: none">• Determine threatened areas and populations• Determine safe distances, refuge, evacuation routes• Activate evacuation / provide for medical treatment
Protect Humans and Animals	<ul style="list-style-type: none">• Suppress airborne hazards: vapors, gas, and dust• Notify affected workers, residents• Control access to spill and threatened areas
Prevent/Control Fire, Explosions	<ul style="list-style-type: none">• Assess existing/potential fires or explosion hazards• Exercise caution with POLs and flammables• Control ignition sources and fuels
Set Envir. Protection Priorities	<ul style="list-style-type: none">• Drinking water resources• Water/wastewater treatment plants• Critical or sensitive ecological areas
Prevent Material Spread	<ul style="list-style-type: none">• Stop or slow the release• Set up containments/diversions, impoundments• Transfer materials to safe storage
Address Non-Critical Priorities	<ul style="list-style-type: none">• Recover human and animal victims• Recover property and equipment in immediate danger• Prevent property and equipment damage• Dispose of spilled materials

Figure 3. INITIAL SPILL RESPONSE AND NOTIFICATION PROCEDURES

POINTS OF CONTACT

Personnel and organizations to be contacted in the event of a POL or HS spill at the USAG Mannheim are identified in Table A-8.1.

In the following table, some telephone numbers are given as DSN numbers. The equivalent civilian area codes for the DSN number are given below.

DSN number	Civilian Area Code
380	0621-730
381	0621-730
382	0621-779

Table A-8.1. POCs for Spills at the USAG Mannheim

Position/Title	Name of Individual	Organization/ Mailing Address	Telephone No. (Work)	Telephone No. (Cell Phone)
Facility Incident Commander (FIC)	Shift leader of Fire & Emergency Division	Building 21, Coleman Barracks	DSN 382-4120	0162-2728356 Emergency: DSN 117
Alternate Facility Incident Commander (FIC)	Mr. Krug	Fire Chief, Building 21, Coleman Barracks	DSN 382-4690	0162-2728380
